

List of Popular LLM Models and Their One-Line Advantages

GPT-5: Excellent reasoning depth with strong general-purpose performance.

GPT-4o: Fast multimodal understanding with balanced accuracy.

Claude 3.7 Sonnet: Great long-context handling and safe reasoning.

Llama 3.1: Open-source, efficient, and strong for coding and chat.

Gemma 2: Lightweight open model optimized for fast inference.

Mistral 7B: Small yet powerful with efficient inference.

Phi-3: Tiny model with high-quality language understanding.

Mixtral 8x7B: Mixture-of-experts with great throughput.

Gemini Flash: Optimized for real-time multimodal performance.

DeepSeek-Coder: Highly accurate coding-focused model.
